EXHIBITION
DECORATIVE
MINIATURE
AND SMALL FLOWERED TYPES

BOX 431-A

Worcester

Mass.

Classification

The following table will allow you to know in advance in which class you can enter gladiolus varieties in the larger shows. The number following the variety name gives the size and color class figures. Following this is the name of the originator and the year the variety was first made available to the American purchaser.

For example, **BLACK CHERRY**, (554 Rich 48) means Black Cherry is classified under number 554. The 500 means that it belongs in the Giant Glad Class (5½" flowers or larger). The 54 means it is a black red. It was originated by Rich and released for sale in 1948 for the first time.

Cultural Notes

Open packages of bulbs as soon as received. Store in a cool dry place until planting time.

Planting Any time from early spring as soon as the ground is usable until late June. Plant in an open sunny place. Glads will grow in any kind of soil but do best in a sandy, well drained loam.

Fertilizers Any good fertilizer will give good results. A good potato fertilizer is fine. Mix fertilizer into soil carefully and then place bulbs an inch or two above soil containing fertilizer. Plant from 3 to 6 inches deep depending on the size of bulb.

Disinfecting Dip all bulbs and bulblets in a disinfectant in order to kill thrips and to prevent possible disease infection on the bulbs. Burn all bulbs showing rot.

Cutting The spikes should be cut when the first floret is in full bloom. Always leave four leaves on the plant when cutting to develop the bulb for next year.

Digging When the foliage begins to turn brown, it is time to dig the bulbs. Cut tops off close to the bulb. Dry the bulbs for about two weeks. After this time the old bulb and roots can be removed and thrown away. Do not remove the husks on the new bulbs as they protect the bulb during storage.

Storage Store bulbs in trays or bags or boxes at a temperature of around 40 degrees. Give bulbs a light dusting of DDT 5%. This will eliminate any danger of thrips feeding on the bulbs during storage.

Dipping, Dusting and Spraying

Lysol Dip —4 tablespoons of Lysol, 3 gallons of water. Soak bulbs in the Lysol solution for between 3-6 hours; soak bulblets overnight or for 12 hours. After bulbs or bulblets are removed from solution, allow to drain and plant the same day as treated, preferably while still wet.

Dusting for Thrips When the plants are in the third leaf they should be dusted with 5% DDT every two weeks. Best results will be obtained while the dew is still on them.

Spraying for Thrips —1 rounded teaspoon of 50% DDT, 1/2 teaspoon of Dreft, 1 gallon of water. For larger plantings—1/2 lb. of 50% DDT, 1/2 pint of liquid soap, 25 gallons of water. The wettable form of DDT should be used when using a spraying material. Lysol, and DDT are poisonous, so take care in handling these materials. DDT dust must not be inhaled.

Instructions for Ordering

Ordering List carefully varieties wanted on order blank. Add up. Figure discount and add extra bulbs you have chosen to your order. All orders are postpaid anywhere in the United States.

Extra Bulbs On orders accompanied by full payment, if order amounts to \$5.00 or more, add 5% extra in your own choice of bulbs. On orders over \$10.00, select 10% extra. Over \$25.00, select 15% more.

Terms of Business Cash with order. We will refund purchase price of bulbs if they are found unsatisfactory upon receipt and returned to us immediately at our expense. We cannot guarantee results as planting conditions vary so greatly. We make every effort to send out only the finest stock available. Minimum order—\$3.00.

Acknowledgements We acknowledge all orders as soon as possible. Please hold the acknowledgment until bulbs have been received.

Early Orders Please order as soon as possible if you sincerely wish to grow certain varieties. Stocks of some are already low and many will be exhausted long before planting time.

Size of Bulbs (L) Large means 1 1/4" in diameter or larger. (M) Medium means 3/4" to 1 1/4". (S) means 1/4" to 3/4". (B) Bulblets. Packages of bulblets run from 40 to 60, depending on the value of the variety.

Bulblets Expensive varieties should be peeled before planting. Always plant soon after peeling as they dry up quickly. Bulblets should be kept moist during the growing season to get the best results.

Rates 5 bulbs may be purchased at ten rate. 10 bulbs or bulblets, at 8 times single price. 25 at 100 rate. 100 bulbs or bulblets, at 8 times 10 rate.

New Introductions From Holland

For the first time, this season, the following 10 new varieties of gladiolus are released in the United States. They are very new and very few bulbs are in existence of all the varieties, so in all cases only small bulbs are offered. In a few cases where medium bulbs are available, we will send these instead of small for the same price. Please do not specify as we will send the largest bulbs available in all cases unless directed to do otherwise. All of these varieties are introductions of the firm De Bruyn of Holland. Among them are several that are sure to make the same great names that some other Dutch varieties have already made. Here is a fine selection of new "blues," also.

BLUE MONARCH Enormous giant blue. From a cross of Grand Monarch and Abu Hassan. It is probably the largest "blue" glad ever raised. Color a medium-violet-blue with deeper pansy-violet markings on lower petals. Small only. Each \$4.00.

EXPECTATION A small flowered new "blue" of deep pansy-violet with small darker blue-colored markings and a thin whitish pencil line on the lower petals. Strong, healthy grower. Small only. Each \$3.00.

GULLIVER A giant glad, dwarfing many others. Beautiful wide open round florets. Long flowerhead with 8 open at a time. Soft creamy white with carmine red spots and coloring in throat with light green blotch on lower petals. Late flowering and grows about 6 feet high. Small only. Each \$4.00

IMPERATOR Deep violet-blue with slightly lighter throat and darker markings on lower petals. Spikes are not too long and flowers are not large but it is by far one of the healthiest, strongest and most rapid propagators to be found in this color class. Valuable for every purpose. Grows like a weed. Small only. Each \$3.00.

LONG-RUN Clear cyclamen purple with large creamy white blotches on lower petals. Thin, stiff and strong spikes. Medium sized flowers are placed in single file on the stalk. Unusual novelty opening 6-8 at a time. Healthy tall grower with dark green foliage. Small only, each \$3.00

ODDNESS An attractive medium lilac-purple with a strong carmine blotch large and somewhat diamond shaped, sharply edged yellow. A very striking blotched gladiolus. Large sized, wide open florets. 5-7 open at once. One of the most spectacular blotched varieties. Small only, each \$3.00.

QUEEN JULIANA A strong orange-scarlet of giant size. Opens 6 on a strong long stem. No fading or bleaching. Late flowering. Small only, each \$4.00.

REBELLION Glistening white with glowing deep purple red blotch on creamy yellow ground. Giant sized florets of Salman's Glory type. Easily opening 6-7 at a time. Blooms early to mid-season. Striking new blotched variety. Small only, each \$4.00.

SURFSONG An entirely new medium blue shade in gladiolus best described as a very light purplish shaded blue with pansy blue markings in throat. 6-8 perfectly shaped flowers open at once. Very fast grower and rapid increaser. Small only, each \$4.00.

YELLOW TRIUMPH A beautiful light straw yellow with no trace of any other color. A cross of Morning Kiss and Bouton D'Or with the good habits of both. 8-9 florets open at once on long strong spikes. Recommended without hesitation. Small only, \$5.00.
